

Nov 4, 2024 | CSC301 Full Team Meeting

Attendees:

Jihyuk, Victor, Katarina, Mathew, Mark, Sean, David

- Fixed consolidation issue between frontend and backend.
 - Victor brought up issue where things seemed to work on backend via Postman, but frontend would raise issues
 - Sean fixed the issue, naming issue / masking
- Backend is still exposed, should add an authentication token
- David brought up that we got feedback for D2, so we should incorporate that to our D3 (autocomplete for the search bar etc)

Plan:

Tasks:

Part 1

Consolidation:

- prisma schema (Katarina)
- backend consolidation (Victor)
- frontend consolidation (Sean)

User Story Development:

- Topic Home Screen UI (1 frontend person, Sean)
- Article page (1 frontend person, Sean (routing), Jihyuk (content))
- Connecting UIs across branches (1 frontend Sean)
- Deployment infra (1 frontend Sean, 1 backend Victor)
- Database code (1 backend, Mark)
- User Story 4: (1 frontend Matthew, 1 backend Katarina)
 - As a user, I want to exclude specific publications or articles by keyword in order to find relevant publications faster by excluding irrelevant content.
- User Story 5: (1 frontend David, 1 backend Mark)
 - As a user, I want to filter by a specific date range in order to adjust the recency of the articles I want to read.
- ~~• User Story 6: (might not be able to do it - leave unassigned for now)~~
 - ~~○ As a user, I want to sort by the number of shares within a topic in order to see which articles are gaining traction in the scientific community.~~

Part 2

Documentation: (3 ppl - Katarina, Mark, David)

- updated README

- iteration_3 review report
- etc

Deployment: (4 ppl - Jihyuk, Victor, Sean, Matthew)

- managing deployment
- CI/CD
- Testing (Playwright) (Jihyuk)
- etc
